

BRAD DUNCAN, IT MANAGER FOR AMERICAN PUBLIC LIFE

AMERICAN PUBLIC LIFE

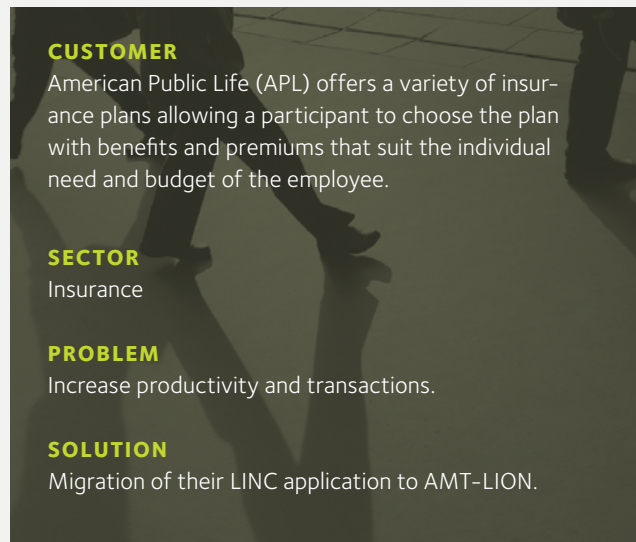

American Public Life (APL) has migrated the core business application to Asysco's Migration Technology (AMT) LION.

APL is a health insurance company located in Jackson, MS (USA). At the end of November 2002 they decided to migrate their LINC application to AMT-LION. In only six weeks time the successful implementation was done. Their system was live in the third week of January of 2003.

They migrated from a Unisys LINC on NT implementation on an ES7000 with MSSQL2000 towards the AMT-LION Runtime Environment on the same ES7000 with the same database engine MS-SQL2000.

"WITH AMT-LION OUR ES7000 HARDWARE IS GIVING US THE PERFORMANCE WE WOULD HAVE EXPECTED THAT IT IS CAPABLE OF"

Mr. Brad Duncan, IT Manager: "We are more than pleased with this AMT-LION product suite. Now the ES7000 hardware is at last giving us the performance we would have expected that it is capable of. This was never delivered in LINC on NT. My end-users tell me "the system flies!" Productivity has gone up dramatically; some departments report that their people can now handle easily three times as many transactions per day than they could before..."

CUSTOMER
American Public Life (APL) offers a variety of insurance plans allowing a participant to choose the plan with benefits and premiums that suit the individual need and budget of the employee.

SECTOR
Insurance

PROBLEM
Increase productivity and transactions.

SOLUTION
Migration of their LINC application to AMT-LION.
